

Colocation Services

Deliver 100% business uptime with Thrive's Tier 3 data centre and hands-on expertise.

Put your business in safe hands with Thrive's state-of-the-art data centre. Our custom built facility operates to the highest standards including ISO27001, and has passed some of the industry's most stringent security requirements to deliver services to both Government and Defence organisations. Thrive Colocation services will keep your business operational, with the flexibility to migrate to private, public or hybrid cloud at the time that's right for you.

Key Features

Security & Fire Detection

From steel palisade fencing, HD CCTV and motion detection to carefully controlled swipe card entry and multi-factor authentication, you can be sure your infrastructure is secure to ISO27001 and beyond. Three-stage fire detection, inert gas suppression and 24/7 network monitoring ensure our facility is safe.

Power & Cooling

High capacity power and cooling delivers cold aisle containment, ensuring your infrastructure is housed in optimal operating temperatures. Dual plant rooms, separate distribution boards and back up generators are the engine powering our 100% uptime guarantee.

Connectivity

Our carrier neutral facility enables you to connect to your carrier of choice. We offer a diverse fibre network across Europe with direct connectivity to resilient SIP services and IP transit, providing flexible, carrier independent, hybrid network solutions.

Support

Thrive's 24/7 remote, intelligent hands and support for third party engineers provides assistance to your infrastructure when you need it most. Our team can also assist with managed firewall, cable and rack migration as well as decommissioning and recommissioning services.

Service Options

Thrive Colocation services include options for rack only, rack with power and add-on services of remote hands support.
